IV. Fill in the numbered blanks in the passage with ONE suitable word from the box. There is ONE extra word.

show chance shows strengths enthusiastic accurately strengthens change

You will make the interview process easier for the employer if you volunteer relevant information about yourself. Think about how you want to present your (26) _____, experiences, education, work

style, skill, and goals. Be prepare to supplement all your answers with examples that support the statements you make.

It is also a good idea to review your resume with a critical eye and identify areas that an employer might see as limitations or want further information. Think about how you can answer difficult questions (27) _____ and positively, while keeping each answer brief.

An interview gives the employer a (28) _____ to get to know you. While you do want to market yourself to the employer, answer each question with an honest response.

Never say anything negative about past experiences, employer, or course and processors. Always think of something positive about an experience and talk about that. You should also be (29) _____.

If you are genuinely interested in the job, let the interviewer know that.

One of the best ways to show you are interested in a job is to demonstrate that you have researched the organization prior to the interview. You can also (30) _____ interest by asking questions about the job, the organization, and its services and products.

V. Read the passage and choose the best answer A, B, C or D for each question.

Plastic is a material we use every day. The first plastics were made more than 100 years ago from parts of plants. Plastics are now made from oil, coal and natural gas. We are using up these things so fast that the Earth's supplies may run out. Because of this, scientists are investigating new ideas for making plastics from plants such as sweet potato, bamboo and flax.

Things made from plastic can be useful for people but bad for the planet. Some plastics can last for long time without wearing out, and can be difficult to get rid of when they are not needed. They can remain in rubbish dumps for hundreds of years.

Recycling is a good way to solve the problems of unwanted plastics. Recycled waste materials can be used again to make new products. This can be difficult as different types of plastic need to be recycled in different ways. Some kinds of plastics can be melted down and used to make new things such as bags and bottles. Others can be made into fibres for clothing.

Another way to protect the environment is to use canvas bags for shopping instead of plastic one. A lot of plastic object can also be reused. Plastic bottles can be refilled many times, rather than thrown away once they are empty. Unwanted plastic goods such as CDs and toys can be sold or given away to charity shop.

31. What is the passage mainly about?

- A. Plastic effects and solutions to the problem. B. Plastic history and its usefulness.
C. The ways to reduce the harm of plastic. D. Materials that plastic is made of.
