Part 3. Complete the following paragraph with the given words in the box. Write the answers on your answersheet. There are three EXTRA words.

available	used	our	electricity	probably	appliances
most					

Electricity is the(21) common form of energy today. In the modern world electricity is very available at the touch of a switch. Electricity has many uses. The most common use of (22)..... is to provide artificial lighting. In factories, electricity is (23)..... to light up the workplace. It also used to operate air-conditioners, computers and many other machines. Electricity is also used to power the many appliances that we have in (24)..... homes. Such appliances include television sets, computers, electric fans, irons and many others. The list is simply endless. Modern man will most(25)be lost without electricity.

Part 4. Read the following passage and write the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions.

One of the most urgent environmental problems in the world today is the shortage of clean water. Having clean drinking water is a basic human right. However, acid rain, industrial pollution and garbage have made many sources of water undrinkable. Lakes, reservoirs and even entire seas have become vast pools of poison. Lake Baikal in Russia is one of the largest lakes in the world. It contains a rich variety of animals and plants, including 1,300 rare species that do not exist anywhere else in the 22 world. Yet, they are being destroyed by the massive volumes of industrial effluent which pour into the lake every day. Even though laws have been made, the government does not have the power to enforce **them**. Most industries simply ignore the regulations. The Mediterranean Sea occupies 1% of the world's water surface, but it is the dumping ground for 50% of all marine pollution. Almost 16 countries regularly throw industrial wastes a few miles off shore. Water is free to everyone. A few years ago, people thought that the supply of clean water in the world was limitless. Today, many water supplies have been ruined by pollution and **sewage**. Clean water is now scarce, and we are at last beginning to respect this precious source. We should do something now.

26. According to the writer, one environmental problem in the world today is _____.
 A. safe water shortage B. pools of poison C. industrial pollution D. population explosion
27. What is the serious problem of Lake Baikal in Russia?
 A. It has 1,300 rare species that do not exist anywhere else in the world.
