B. a – b – c – e – d

C. d – e – a – b – c

D. e – c – b – d – a

Read the following passage about coffee and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

Storms are powerful weather events that bring intense rain, strong winds, and sometimes thunder and lightning. These storms can happen in various parts of the world and are often more frequent during certain seasons, like summer or the rainy season in tropical areas. When a storm approaches, **experts recommend staying indoors due to**

the high risk of floods and flying debris caused by strong winds. Flooding is a common effect of storms, particularly in low-lying areas or places near rivers and coastlines, leading to property damage and travel disruptions.

Thunder and lightning are also significant parts of many storms. Lightning, **which** can strike trees, buildings, or power lines, poses a serious **risk** to people outdoors, while the sound of thunder alerts people to the storm's strength. Due to the dangers of lightning strikes, experts advise avoiding metal objects and electrical devices until the storm has passed.

Meteorologists use weather forecasts to warn communities about approaching storms, allowing people time to prepare. Officials encourage families to secure loose items outside, keep flashlights and emergency supplies ready, and follow local updates. In areas where severe storms are more common, emergency kits with **basic** supplies like water, food, and first aid materials can help people stay safe.

Storms remind us of the importance of preparation and awareness to minimize risk, highlighting the need for reliable weather forecasts and community safety plans.
